Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner requested an explanation from the Applicant's representative for the limitations which were added in the independent claims 6 and 8-11 and these limitations were not described in the specification. Applicant's representative promised that will be responded either on Friday (9/10/04) or latest on Tuesday (9/14/04), but Applicant's representative did not response at all. Examiner assumed that the limitation "a procedure for adjustment that becomes necessary as a result of modification applied to the modification candidate process from among the process history data indicative of the processes prior to execution of the modification"; "the design support system displays the adjustment procedure images in response to a command before the modification is executed" is new matter.
